WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Open-topped box 700 long, 600 wide, 960 tall, 3 mm sheet, welded inside and out. Front is the door side, back the trailer side.
Door opening in the front, centred: 300 wide x 240 tall, bottom 183 up from the bottom edge (the board floor is 53 thick).
Air inlet in the front, centred: 160 wide x 60 tall, bottom 68 up.
Two tube slots in the right end (towards the header), centred on the width: 40 wide, from 446 to 516 up and from 846 to 916 up.
Top frame: 25 x 25 x 3 angle round the outside, top flush with the wall tops; 14 holes 9 mm for the roof bolts, about 180 apart.
Weld on before lining: coil brackets (sketch 103), damper guides (sketch 107), hinge leaves, latch keeper, gland studs, clip lugs.
Check: diagonals of the top equal within 3; walls flat within 3.
