WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

300 long of DN50 stainless pipe with welded end caps (front and back).
Weld on: a 25 mm (1 in) socket in the left side, centred, for the
coil outlet; a 3/4 in socket on top 60 behind the centre for the
relief valve; a 1/4 in socket on top 70 in front for the gauge;
a DN32 branch out of the front cap to the seal pot;
a 3/4 in nipple out of the back cap to the diverter.
Nothing on the header may ever close it off from the seal pot.
Fit: rests on the post saddle under two U-bolts.
Gauge: 0 to 1 bar on a siphon loop, facing the operator.
Check: pressure test with water with the seal pot side plugged
for the test only; remove the plug after the test.
