WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two. Glue and screw two pieces of 40 mm hardwood, 400 x 100.
Cut the top to a 250 radius, centred, so the drum sits 20 above the deck at its lowest point.
Two 11 mm holes for M10 coach bolts through the deck, 25 in from the ends.
Fit: across the deck, 440 apart (centres), under the drum.
The drum is held down by two ratchet straps to lashing points.
Check: the drum sits in both saddles without rocking.
