WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two. Outer pan: 1 mm aluminium, 1200 x 1000 x 250, open at the bottom, corners folded and riveted.
Inner pan: 1 mm aluminium, 1120 x 920 x 210, open at the bottom.
Fill the 40 mm gap at the top and sides with mineral wool slab; close the bottom edge with a riveted U-channel.
Fit hardwood blocks in the wool at the four handle foot plates and the inlet, with a 3 mm aluminium backing plate 100 square inside each handle block, so bolts clamp on wood and plate, not on wool.
Inlet hole: 30.6 through both skins, centred across, 150 in from the end nearest the trailer.
Check: the hood lies flat on a floor; no wool shows.
